

## SPRAYED THERMOCORK, STUNNING & 100% NATURAL!

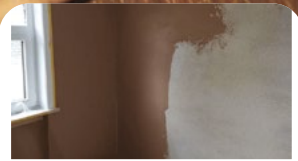

### ROOFING

Thermocork provides a thermal waterproof layer to any pitched roof without adding the weight associated with traditional material. Its easy application allows for large areas to be coated quickly, externally, without impacting on the building's occupants.

### EXTERNAL RENDER

Thermocork sprayed cork coating gives properties a low-maintenance and durable finish. Not only does it waterproof but it also improves thermal and acoustic insulation by eliminating thermal bridges.

### THERMAL WALL INSULATION

An ultra thin coating of Thermocork will help to achieve high insulation values. Skimming over the cork results in a smooth finish at less than 10mm thickness with no disturbance of existing windows, coving or skirting boards.

### CONDENSATION & DAMP ELIMINATION

Thermocork eliminates condensation by reducing thermal shock, acting as a thermal barrier. Thermocork adheres to any surface from metal to skimmed walls.

## WHY USE A CORK COATING?

ENERGY SAVING | THERMAL INSULATION | ACOUSTIC  
ECOLOGICAL | DURABLE | FIRE RESISTANT | DECORATIVE  
VAPOUR-PERMEABLE | WATER-REPELLENT

# Where to use it and why

## Walls

Renovation and insulation in one. Treat walls with spray cork to create a new facade and at the same time improve the insulation performance. Better, stronger and more durable than all existing and better known finishing systems.

The spray cork waterproof system; guaranteed 100% waterproof and insulated dry wall. Beautiful new walls with perfectly protected insulation providing immediate energy savings.

## Interior Walls/Ceilings

Thermal and acoustic insulation, suitable for a modern interior or to transform a classic interior. Available in a finer grain specially designed for a smoother interior finish, available in many colours.

## Cellars & Lofts

Musty damp basements regain a healthy environment. By treating it with spray cork, mould, bacteria and pests are eradicated.

## Roofs

Suitable for flat roofs, platforms and worn, dirty slate. When used together with the waterproof system a 100% waterproof covering is achieved.

## Acoustic

Ideal for apartments, offices and work areas. The perfect solution for party walls and floors. It can reduce noise from music and cinema rooms and improve acoustic in open areas.

Available in various colors:

## Properties

- Improves thermal performance of a building
- Environmentally friendly, sustainable and a 100% natural product
- Spray Cork is water repellent, breathable and maintenance free
- Anti-condensation and reduction of thermal bridges
- Excellent adhesion to all substrates such as brick, cement, plaster, wood, metal and asphalt
- Easily applied
